AU BALES OFFERED		39,108	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI & AWEX

The brief upward run ended this week with the EMI giving back 23 of the 88 cents gained over the previous two series (to close at 1300). Despite the price correction and some seller resistance, A\$52 million worth of wool still exchanged ownership.

Much of the losses resulted from currency movement, with the AUD strengthening by 1.5% against the USD. Therefore, demand from those purchasing in US dollars (China) remained almost unchanged. However, the overarching purchasing factors remained in place as the mainly Indian and European destination operators dominated the volume on offer, particularly on the better-specified sale lots.

Merino fleece lines finer than 18 microns suffered the largest falls, on average declining by around 65 cents. The better types were less affected in these finer microns, with the lower spec types dragging the MPGs back. Merino fleece, broader than 18.5 microns, were generally 40 cents cheaper. The falls were more consistent across the board, with only the very best sale lots less affected. 19.5 to 20.5 micron area appeared popular with the sub-continent users, as top-quality and well-specified wools were purchased in volume.

Crossbred wools of all types and descriptions were 10 -15 cents lower, but pleasingly a slight improvement in quality is becoming apparent. The carding market was the only sector to buck the trend this week, gaining 20 cents for the series.

With ongoing and widespread flooding across large parts of south-eastern Australia, shearing and the flow of wool onto the market is set to be significantly disrupted. Over 43,000 bales are currently scheduled for sale next week.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1673 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1673 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
