* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

94.17 US as of 28/02/2008

NORTHERN REGION – Newcastle Sale N34/07

On Tuesday – Newcastle opened on a firm note, with most types gaining ground. Spinners were mainly ahead when compared to the previous Newcastle sale in November, with 17.0 to 17.5 microns 20-40 cents dearer (these were up to 100 cents dearer when compared to Launceston two weeks ago). Best styles at the finer edge closed 10-20 cents higher when compared to last weeks Sydney sale, while the broader microns firmed a few cents on limited quantity. Best merino broken sold 10-20 cents dearer when compared to a lower styled selection last week, other skirtings were 10 cents dearer. Locks & crutchings were also 10-20 cents dearer (17 micron locks up to 30 cents dearer). Only a handful of crossbred lots were on offer, selling at a similar rate to the previous week. 4,076 bales were offered with a clearance rate of 96.5%.

On Wednesday – The merino fleece market softened, spinners were not as extreme today with prices tending 2-5% cheaper (although the odd better lot remained unchanged). Best styles were up to 20 cents cheaper, with some of the lower strength and style types tending to be less affected. There was weakness evident around the 19.5 micron range which closed up to 30 cents lower while broader microns eased a more modest 10 cents on reasonably limited numbers. Merino skirtings closed firm, despite the weakening fleece market. Locks & crutchings were also generally unchanged while the few crossbred lots on offer eased 5-10 cents. 6,551 bales were offered with a clearance rate of 93.6%.

On Thursday – Merino fleece continued to weaken on the back of a strengthening AUD. The bulk of the offering (Best styles) were up to 20 cents cheaper at the finer end (19 um) along with a small selection of Good style's and lower strength types. Spinners provide some encouragement with better types returning close to Tuesday's levels with a 50 cent gain (best spinners +100 cents). At the broader end, 20 & 23 microns eased while other microns remained largely unchanged. Most skirting types were unchanged as were locks & crutchings. Crossbreds were 10-15 cents lower (compared to last Thursday) on the largest selection for the week. 6,686 bales were offered with a clearance rate of 95%.

Next weeks offering consists of 57,945 bales (an increase of 7.1% on the previous estimate of 54,085).

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
