| AU BALES OFFERED | | | * 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. | | | | | | | | | | | | | | | | | |
| AU BALES SOLD | | | * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide. | | | | | | | | | | | | | | | | | |

MARKET COMMENTARY Source: AWEX

The market closed lower this week, falling for the third successive series. 44,437 bales were offered (5,000 fewer than forecast) after 6.4% were withdrawn before sale.

This week's Northern Region sale was held at the Sydney Royal Easter Show, providing an excellent opportunity to showcase Australian wool auctions to the general public. The major downward impact on the market was felt in the fine merino fleece types. The individual MPGs for 18.5 microns and finer, fell 20-61 cents. 19.5 to 21 microns received more support, resulting in only minor movements, while the oddments received strong competition, resulting in the three Merino Carding Indicators (MC) closing up by an average of over 6 cents.

By week's end, the EMI lost 10 cents, closing at 1,142. The EMI is now only 16 cents above the season opening (July 2023), having lost 70 cents (5.8%) since opening in January after the Christmas recess.

Next week the market heads into the annual Easter recess. Sales will resume week beginning Monday the 8th of April.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1468 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: 27/03/24 Any highlighted in yellow are recent trades, trading since: Thursday, 21 March 2024

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 15: Returns pr head for skirted fleece wool.

| Skirted FLC Weight 2 Kg | | | Micron | | | | | | | | | | | | | | | | | |
