AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market performed strongly this week with all sectors recording positive movements. Melbourne and Sydney opened proceedings on the first selling day and from the opening lot it was apparent that buyer sentiment had improved. The stronger sentiment resulted in price increases across all merino fleece types and descriptions. The individual Northern Region MPG's rose by 18-19 cents, pushing the NRI up by 19 to close at 1,212.

On day two, it was Melbourne and Fremantle in operation. Melbourne commenced at similar levels to the previous day with some better types attracting premiums of 10-20 cents, while the lower spec & poorly prepared lines were discounted by equally as much, resulting in little movement in the MPG's. Fremantle also played catch up on day two, pushing the Western Region MPG's up by 29-38 cents.

The Crossbred sector gained ground, with the main rises being in the 26 to 28 micron range, which rose by 10-20 cents. The oddments also recorded healthy gains (for the second successive week) with Locks, stains and crutchings generally gaining 20-40 cents.

There are no sales in Fremantle next week, reducing the national offering to 17,136 bales.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2138 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1572 for 60% of the time, over the past ten years.

JEMALONG WOOL BULLETIN

(week ending 27/05/2020)

Page 10/27

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above '**Rise or Fall**' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
