AU BALES OFFERED	43,582	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD	40,987	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																		
AU PASSED-IN%	6.0%

MARKET COMMENTARY Source: AWEX

This week's market was unable to maintain its sharp upward trajectory. There were a total of 43,582 bales available to the trade; of these, 40,932 were sold, meaning that, despite the weaker market, only 6% were passed in, showing that most sellers were willing to accept the prices on offer.

On the opening day, merino MPGs fell by 7 to 74 cents, skirtings followed a similar path, while the oddments defied the trend, recording modest gains. The EMI lost 27 cents, which was the largest daily fall since the 14th of October last year.

With the AUD strengthening against the US\$, buyers were predicting a softer market. The AUD even briefly pushed through 70 US cents on Wednesday. The highest it had been since February 2023. The currency movement was so influential that, when viewed in USD terms, the EMI gained 25 US cents for the day, pushing it to 1162 cents (the highest it had been since the 11th of July 2019).

The second day of selling saw the market generally settle. The EMI gained 3 cents for the day, closing the week 24 cents lower. In USD terms, the market gained another 15 cents, closing the week 40 cents higher, a weekly increase of 3.5%.

Next week, the offering is expected to fall marginally. There are currently 40,480 bales on offer in Sydney, Melbourne and Fremantle.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1509 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1711 for 60% of the time, over the past ten years.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

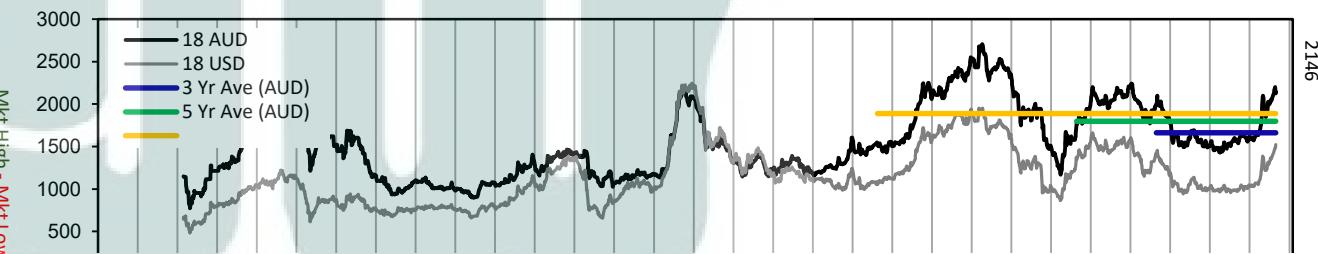

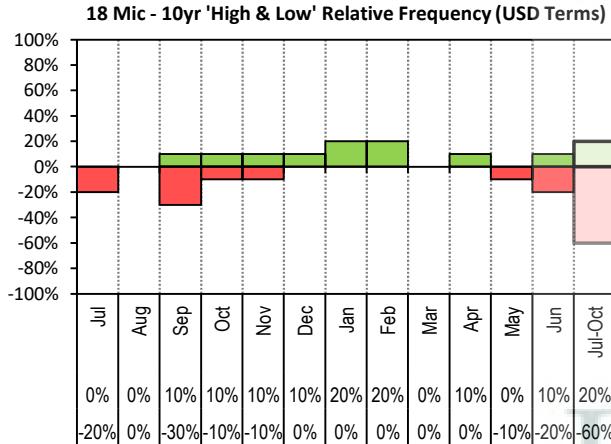

The above graph, shows how often the '12 month high & low' have been achieved for a

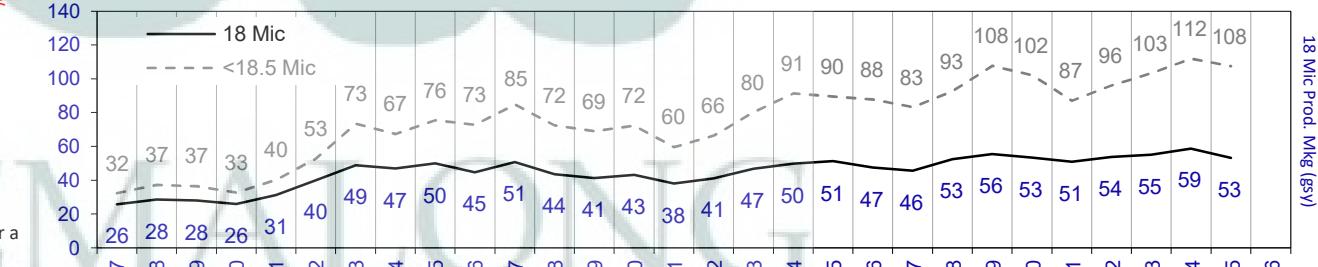

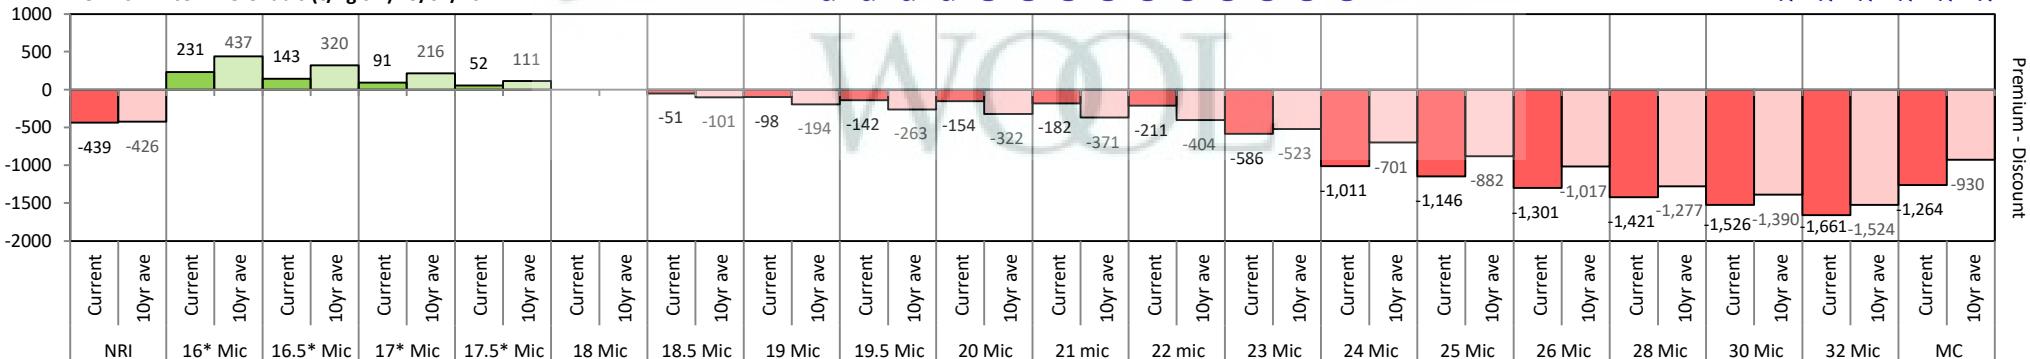

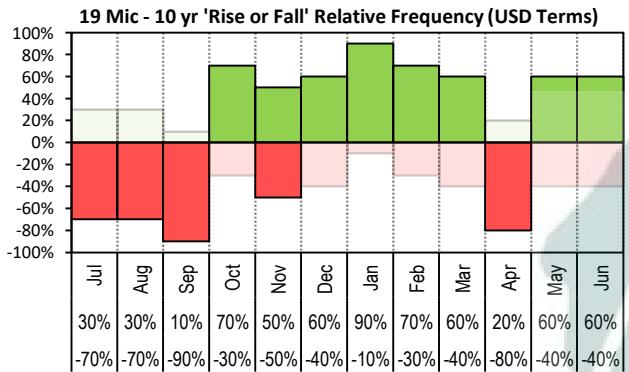

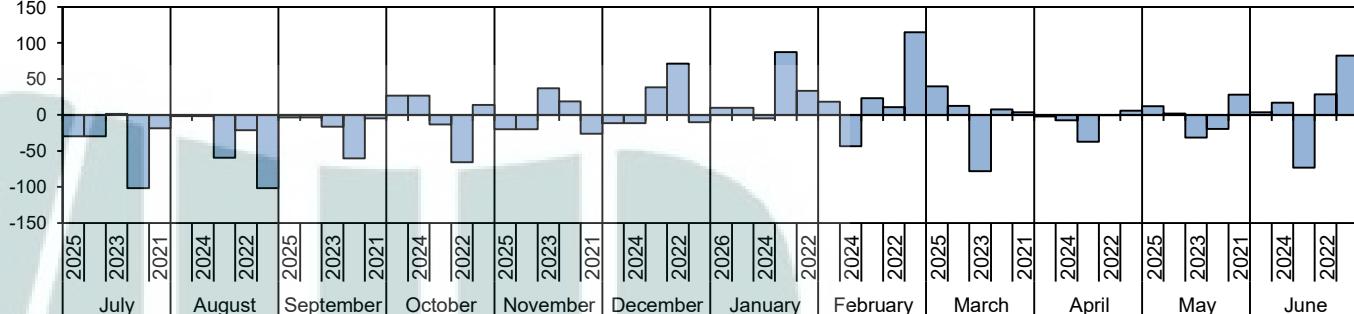

18 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

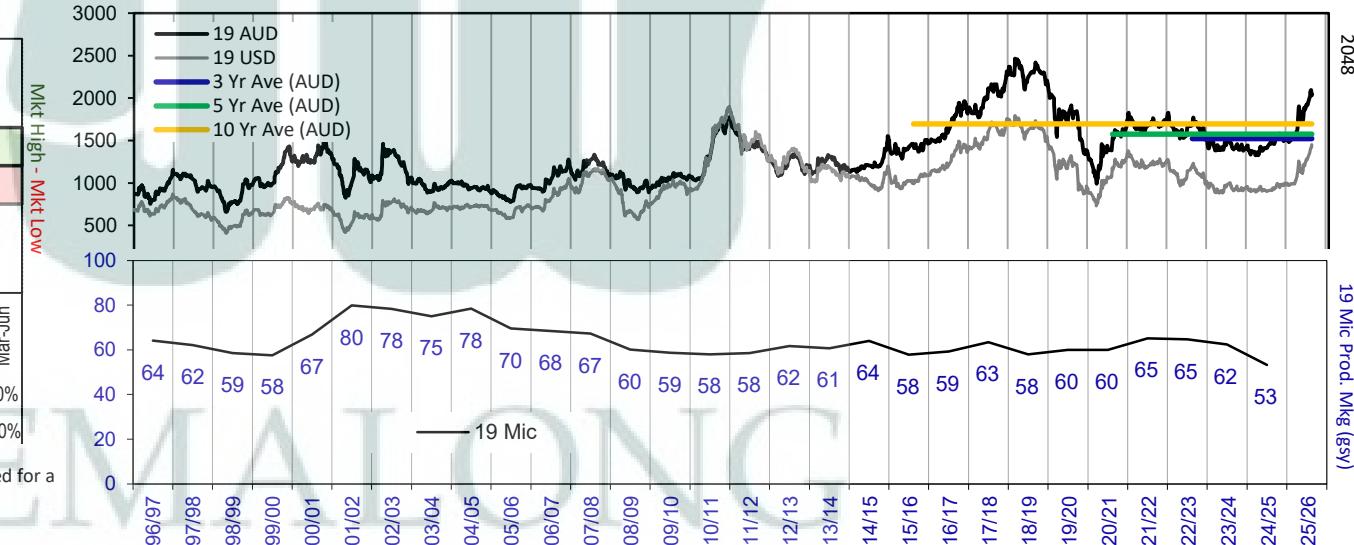

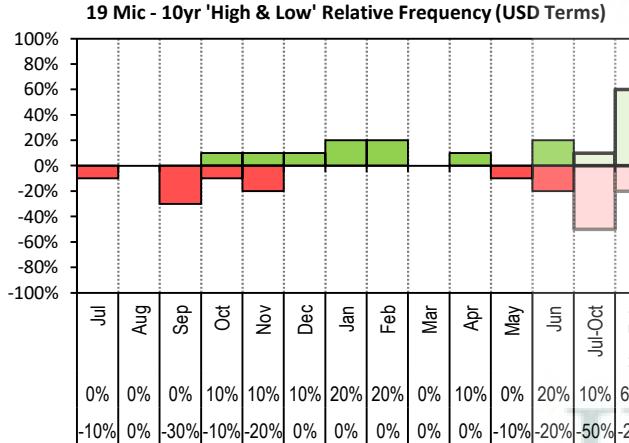

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

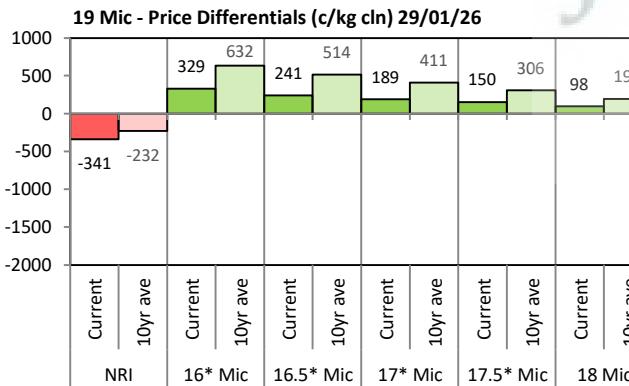

18 Mic - Price Differentials (c/kg cln) 29/01/26

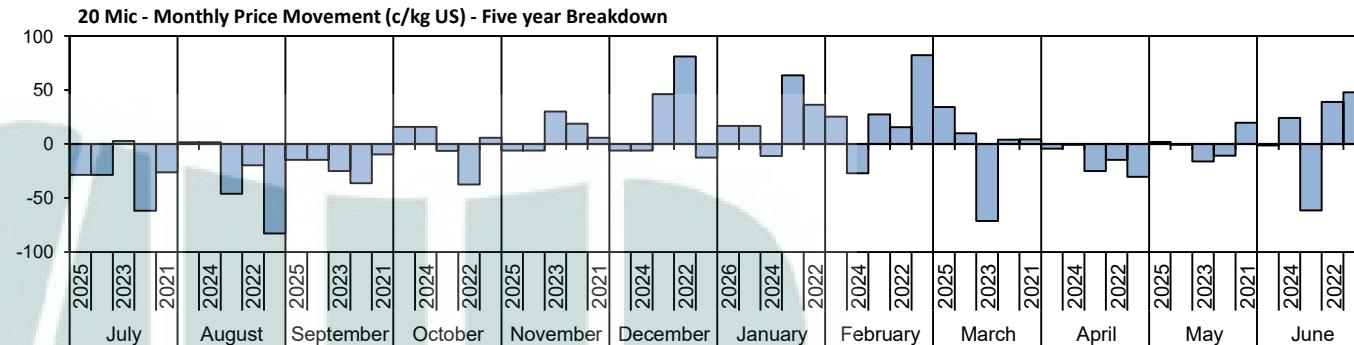

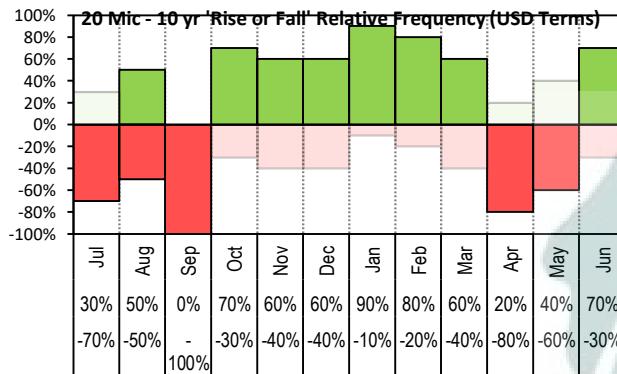

19 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

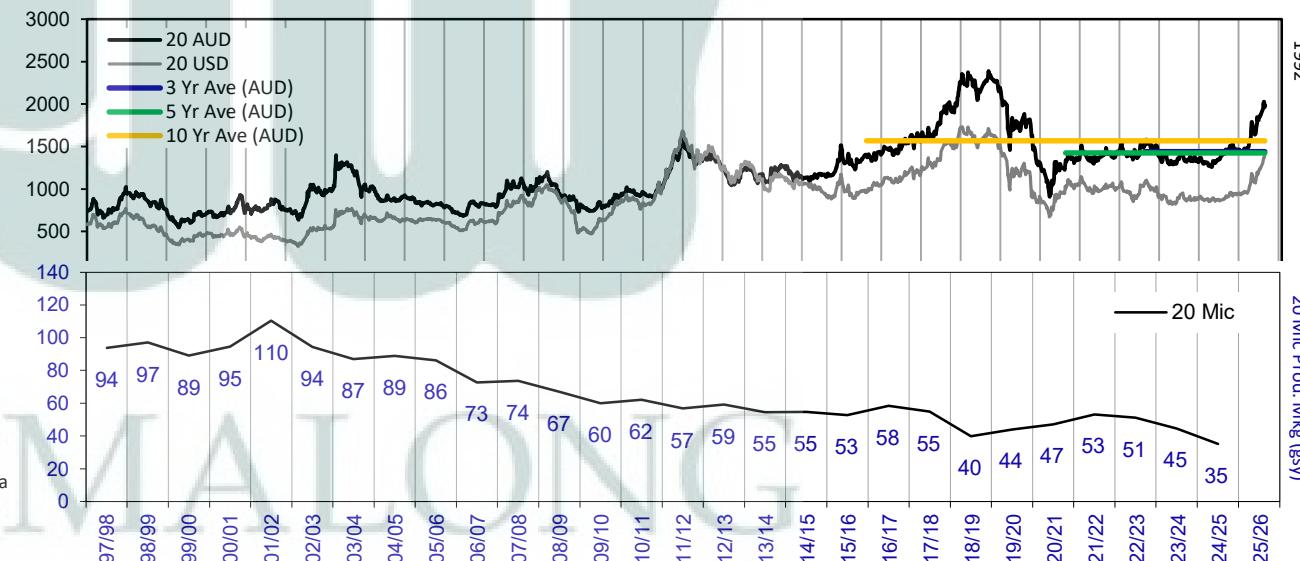

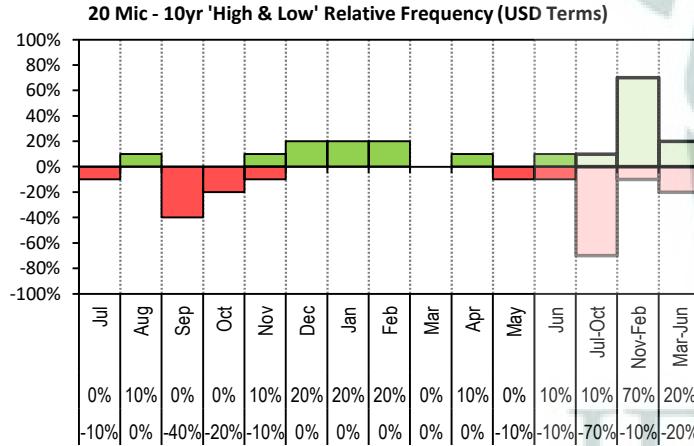

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

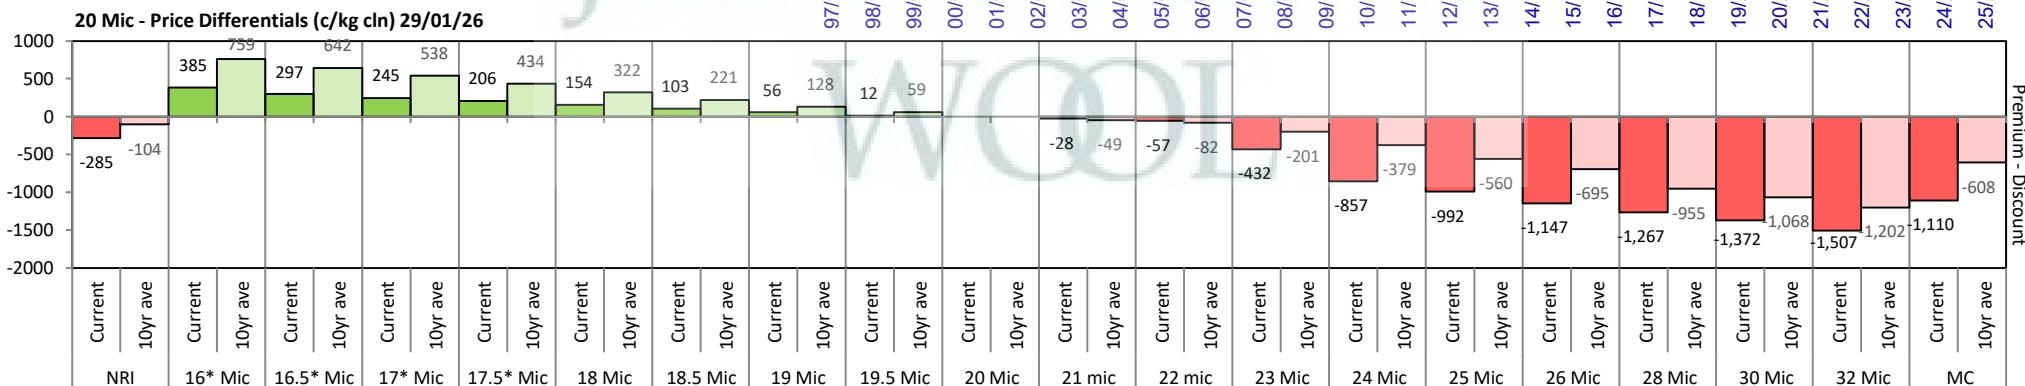

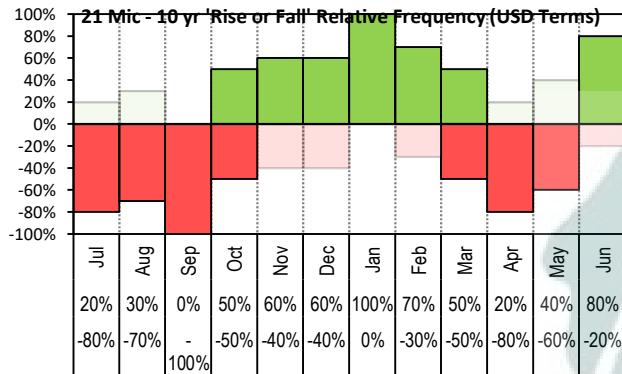

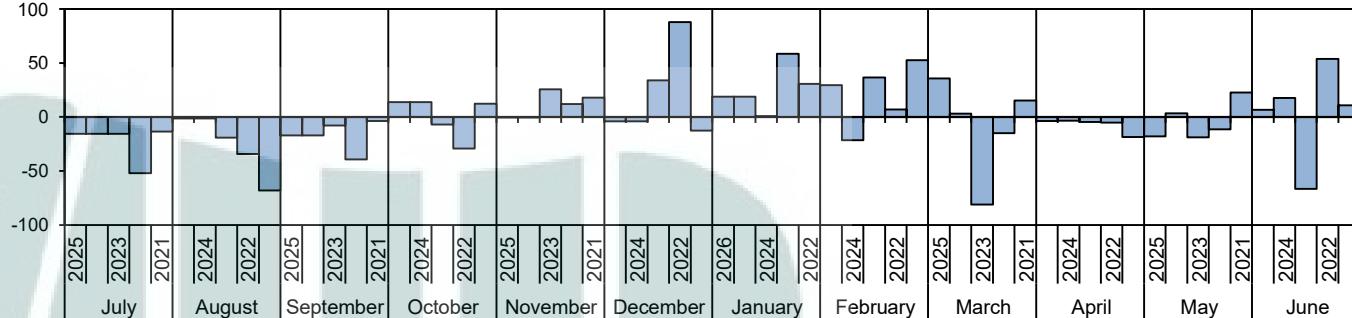

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

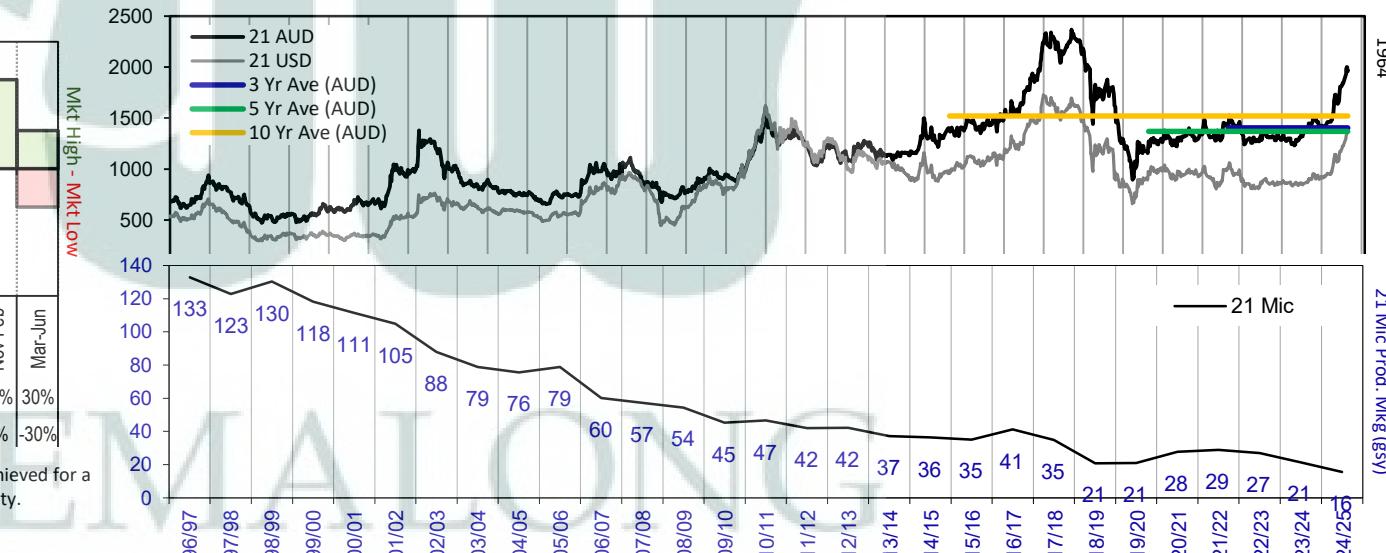

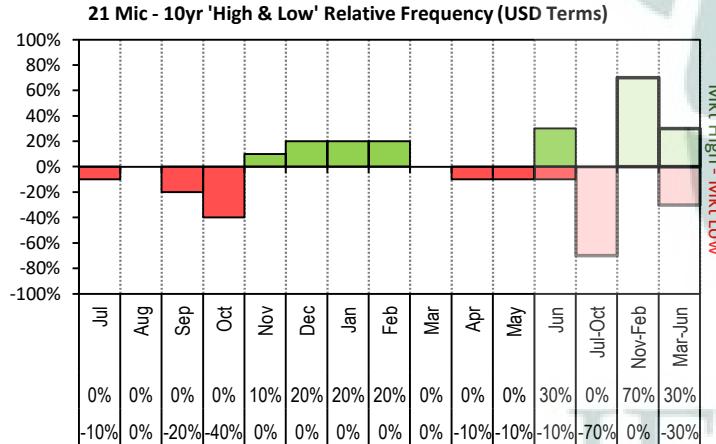

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

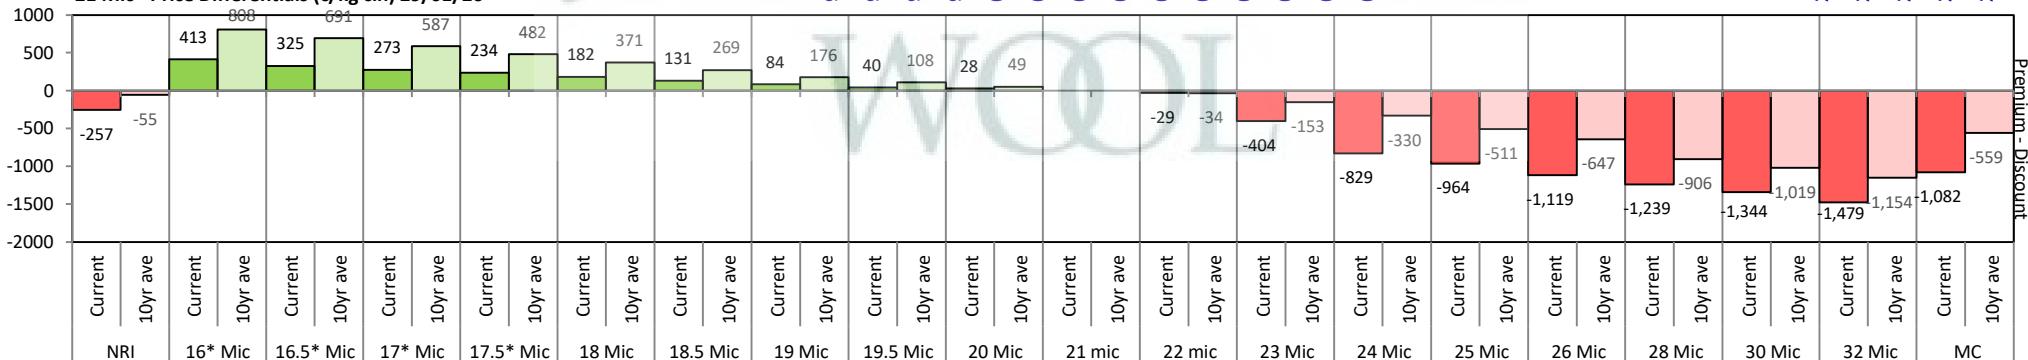

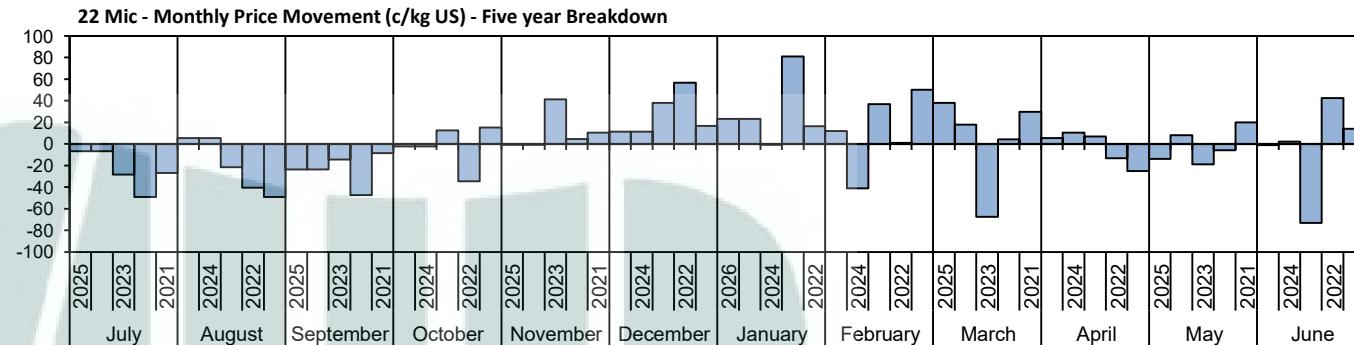

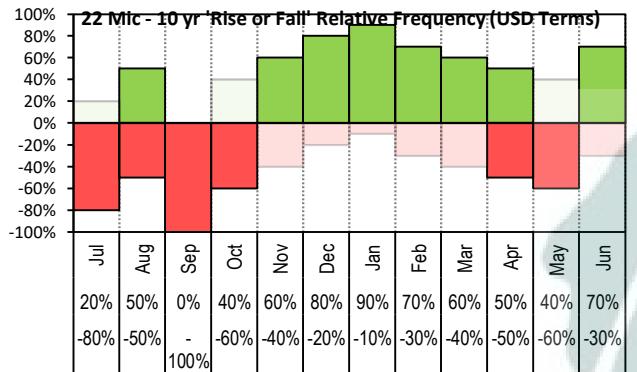

21 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

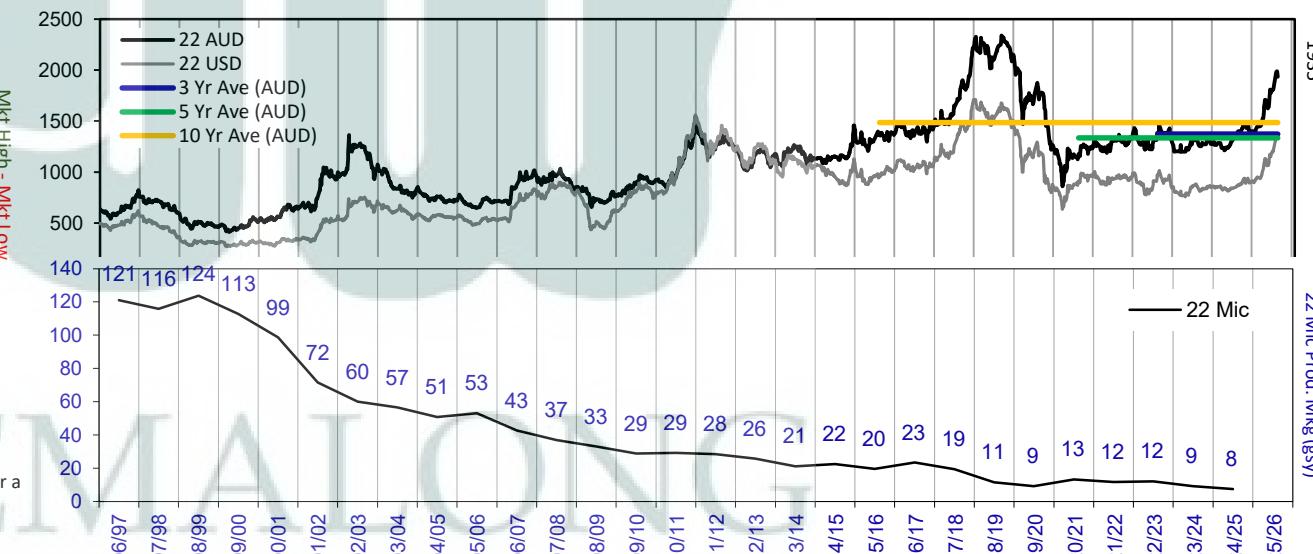

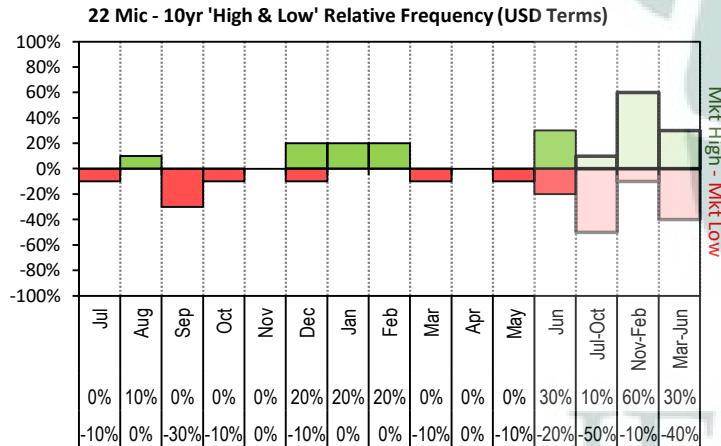

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

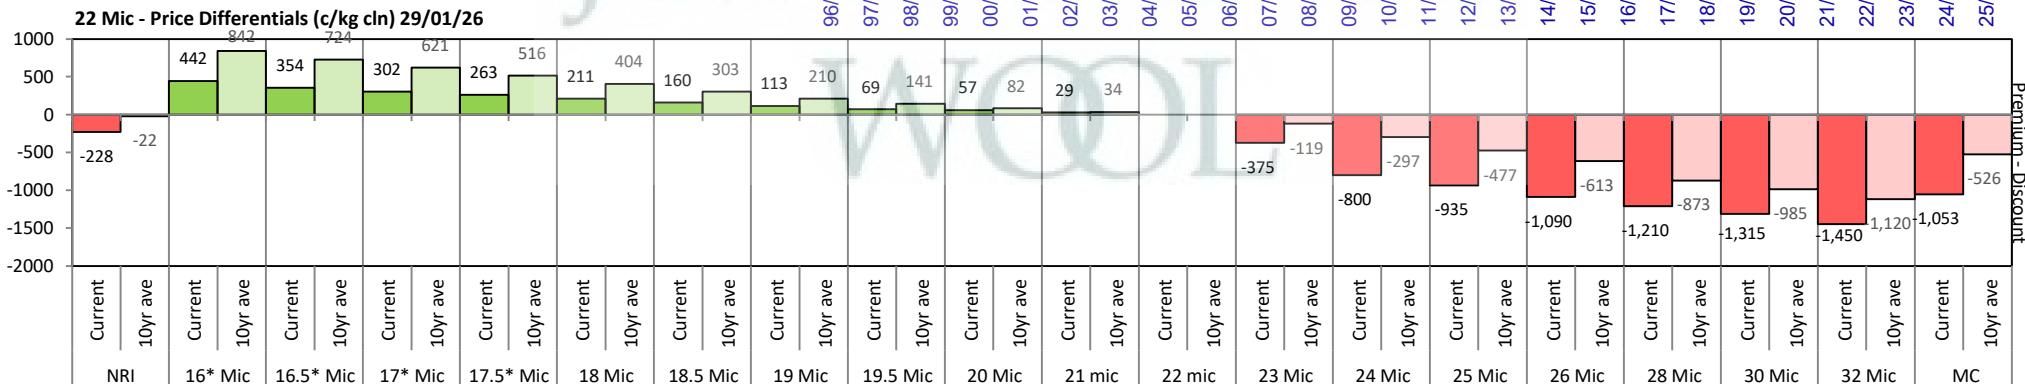

21 Mic - Price Differentials (c/kg cln) 29/01/26

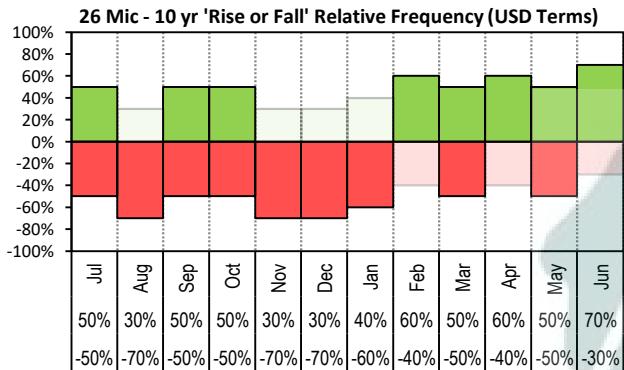

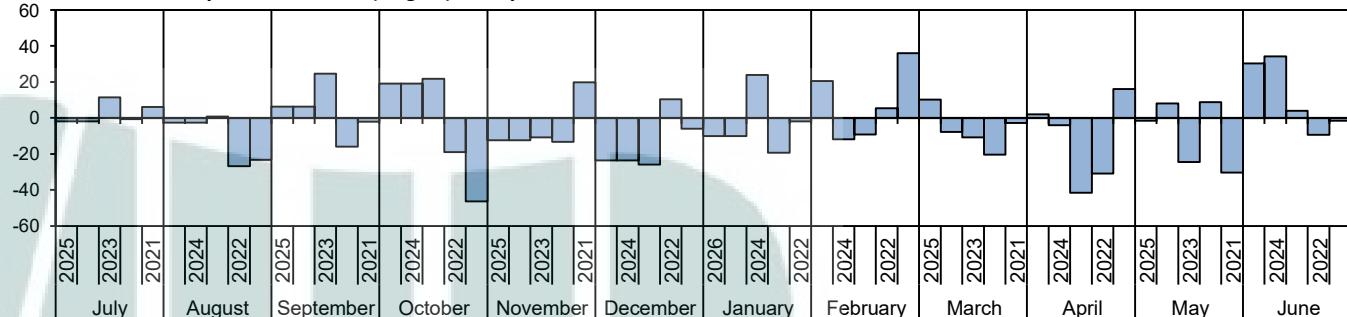

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

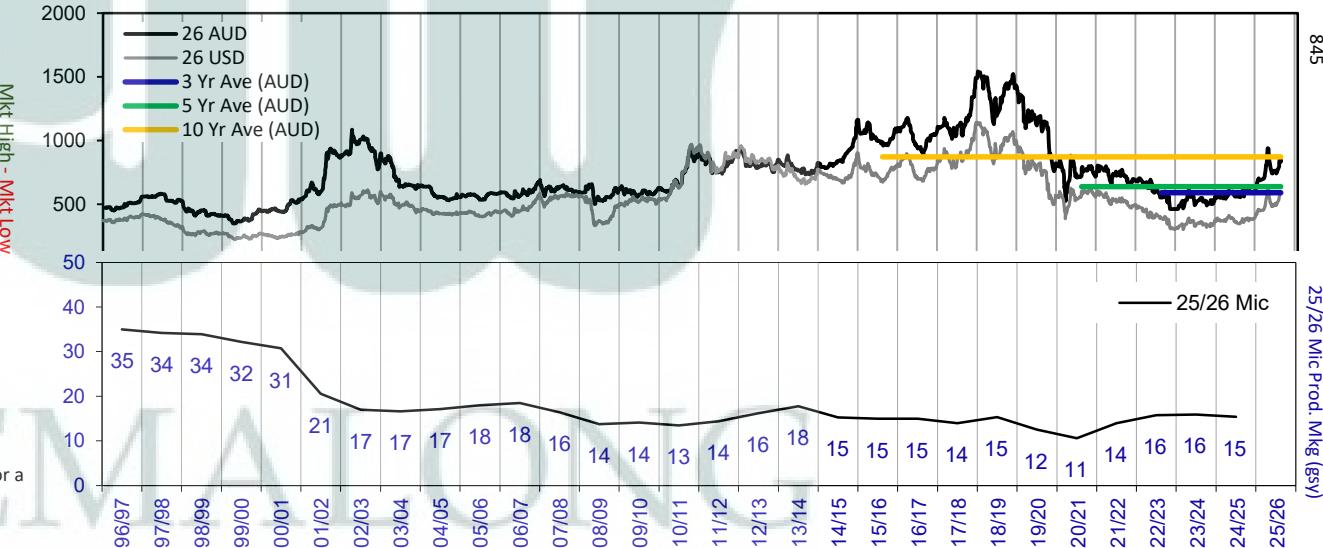

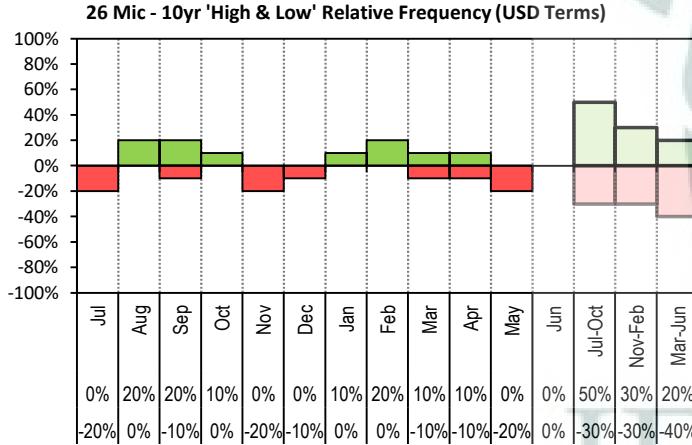

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

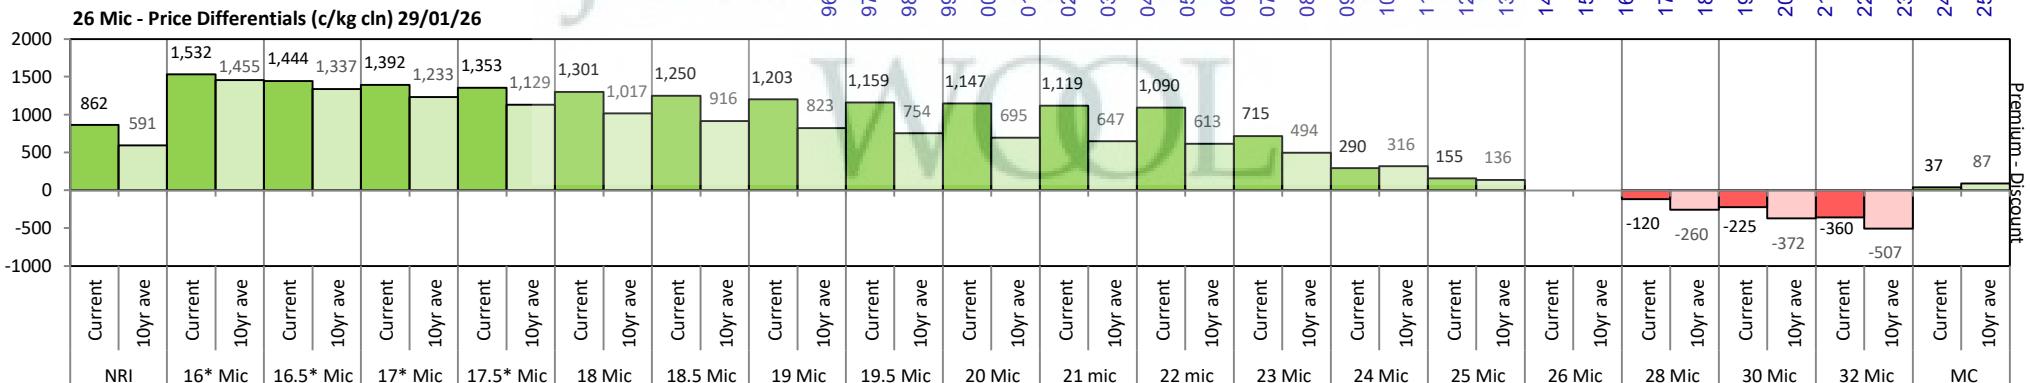

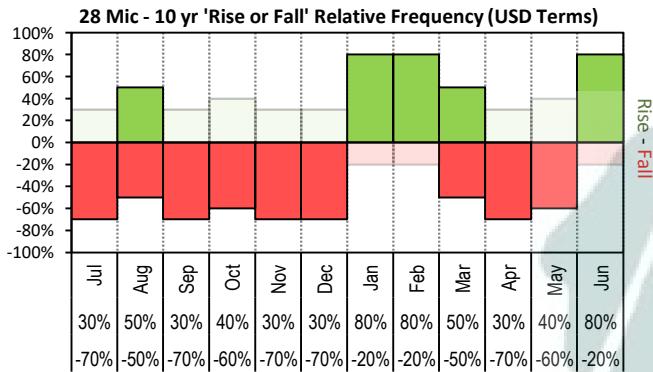

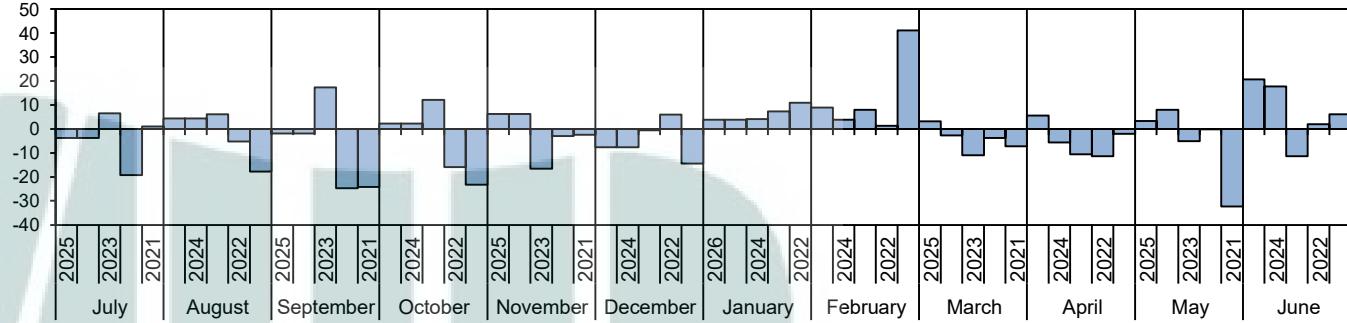

26 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

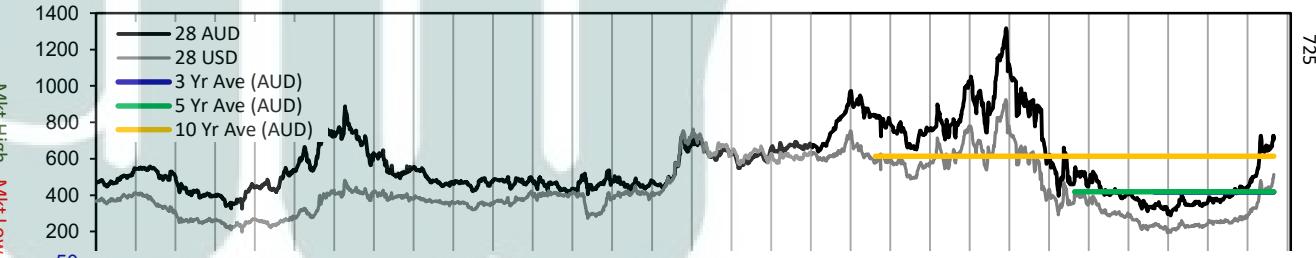

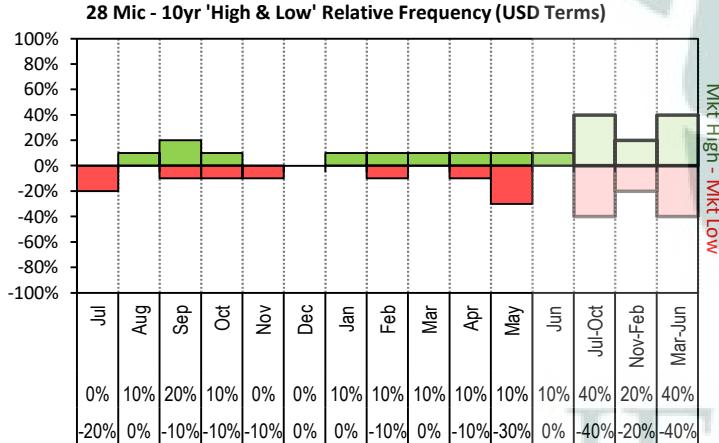

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

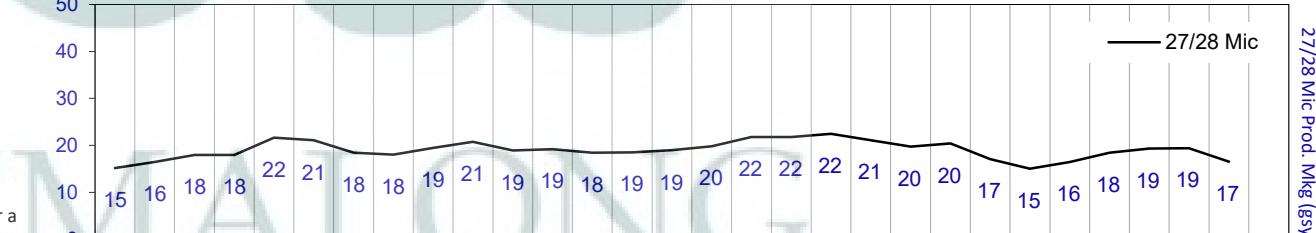

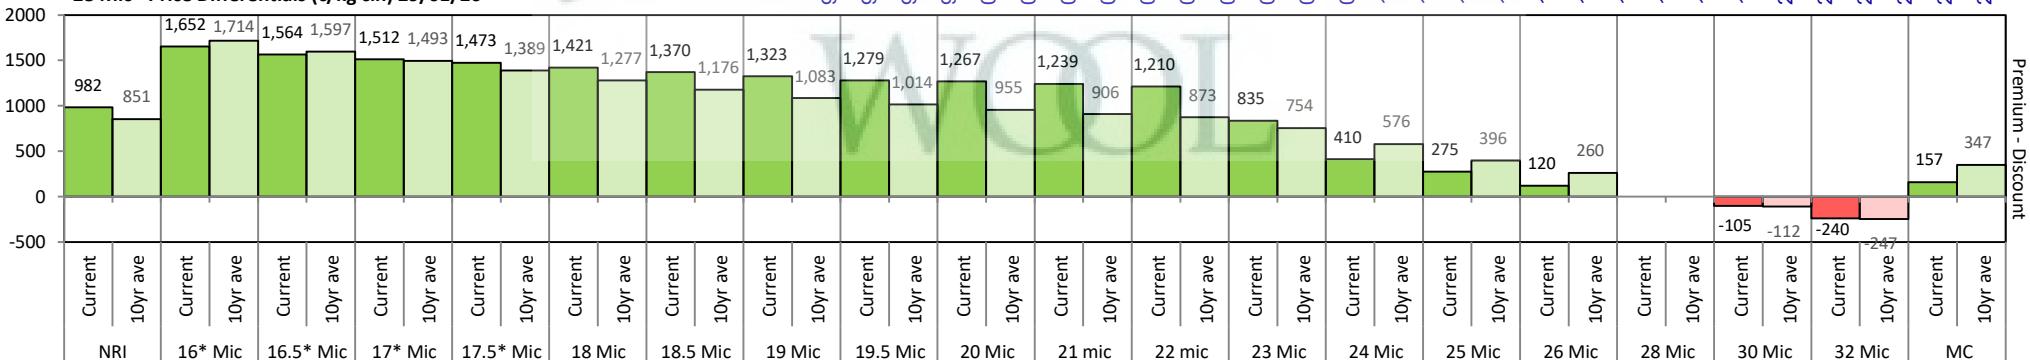

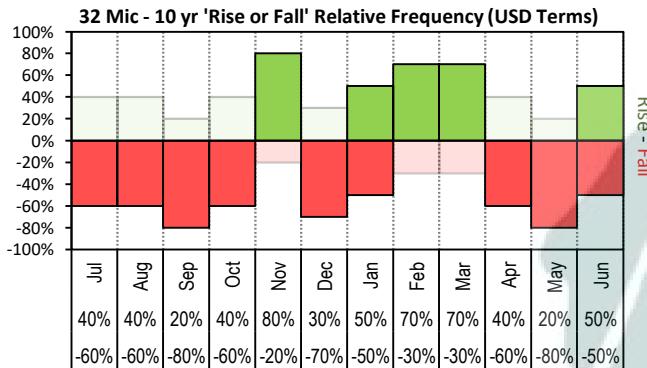

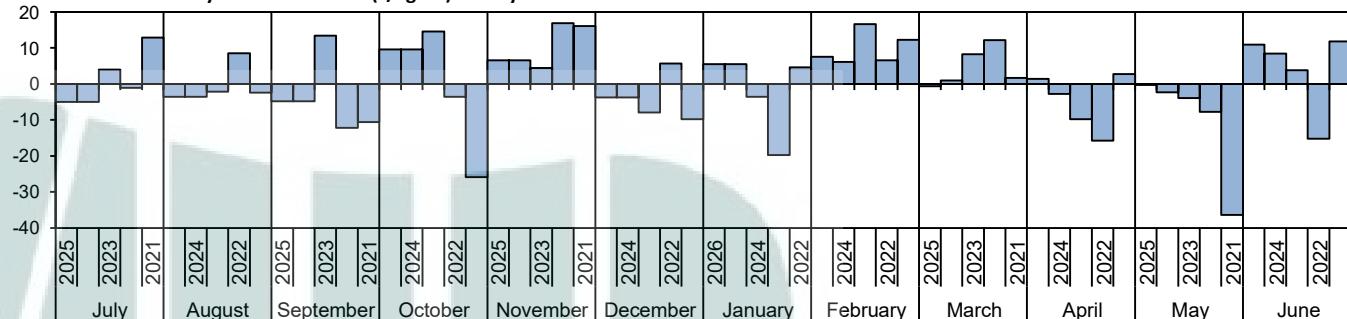

28 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

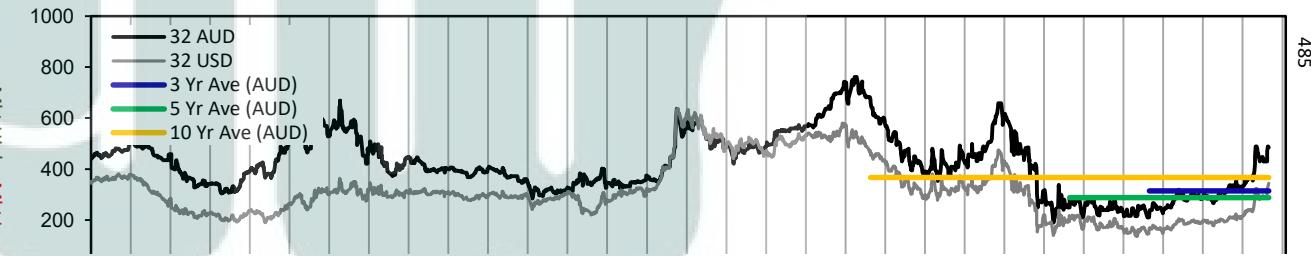

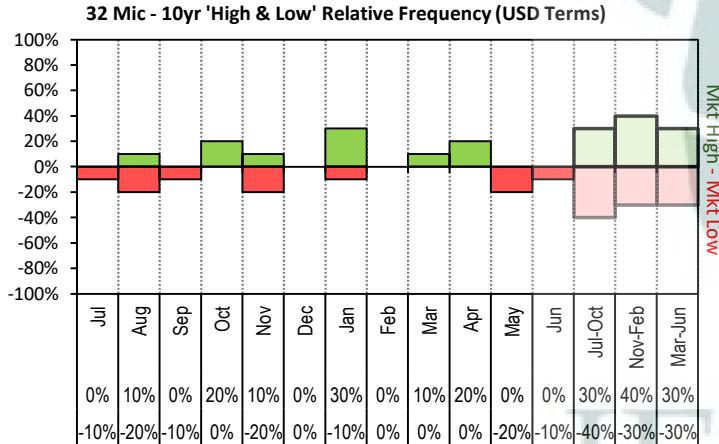

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

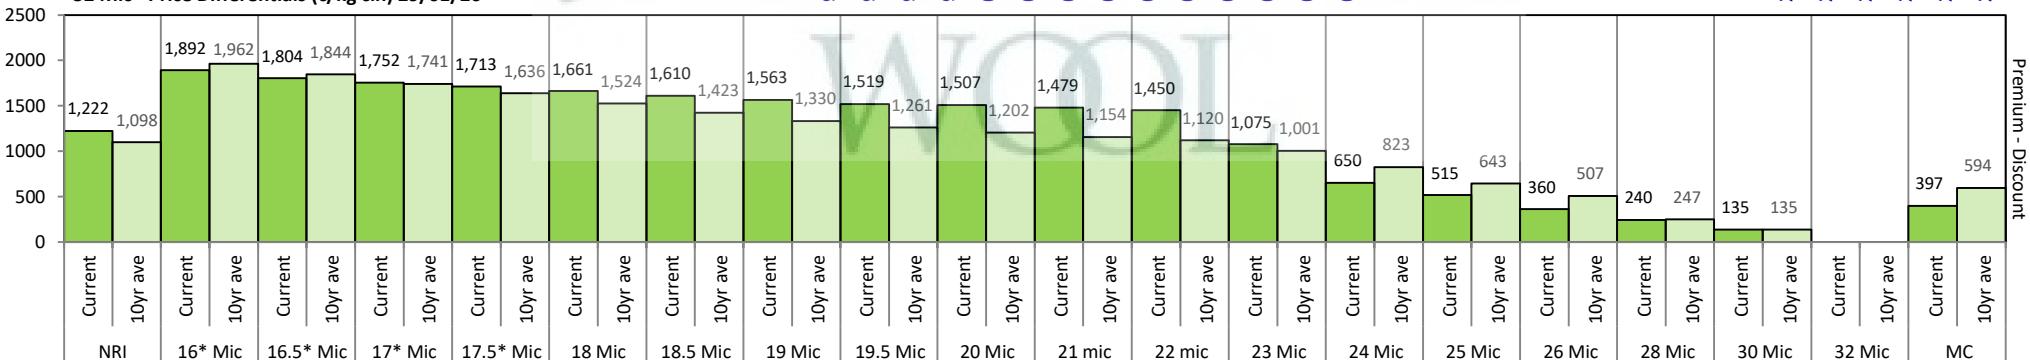

28 Mic - Price Differentials (c/kg cln) 29/01/26

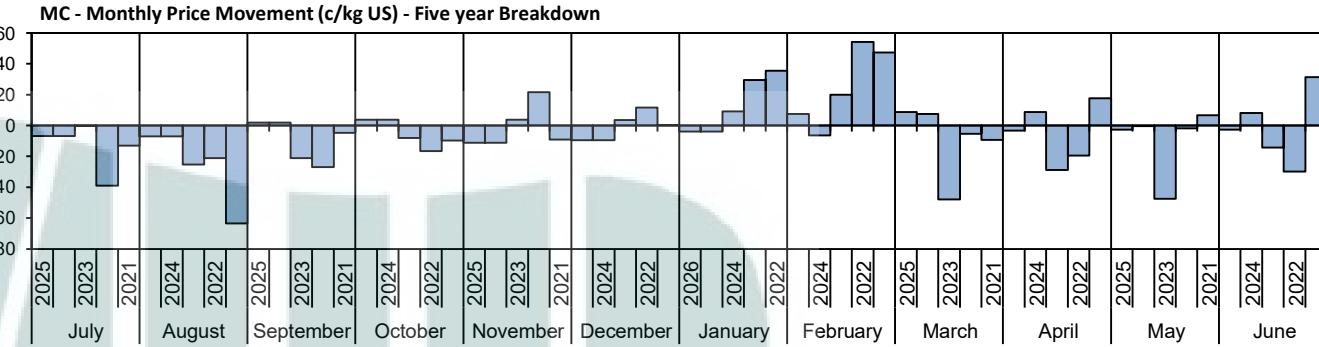

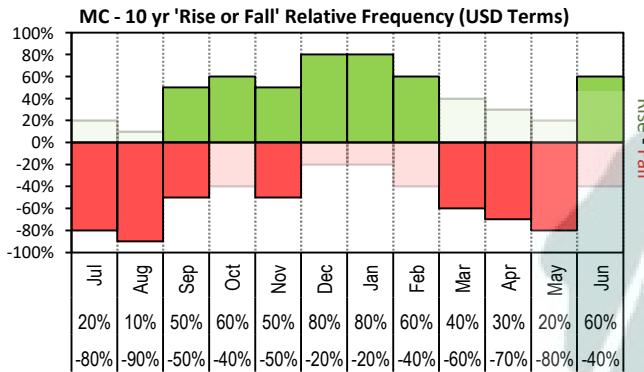

32 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

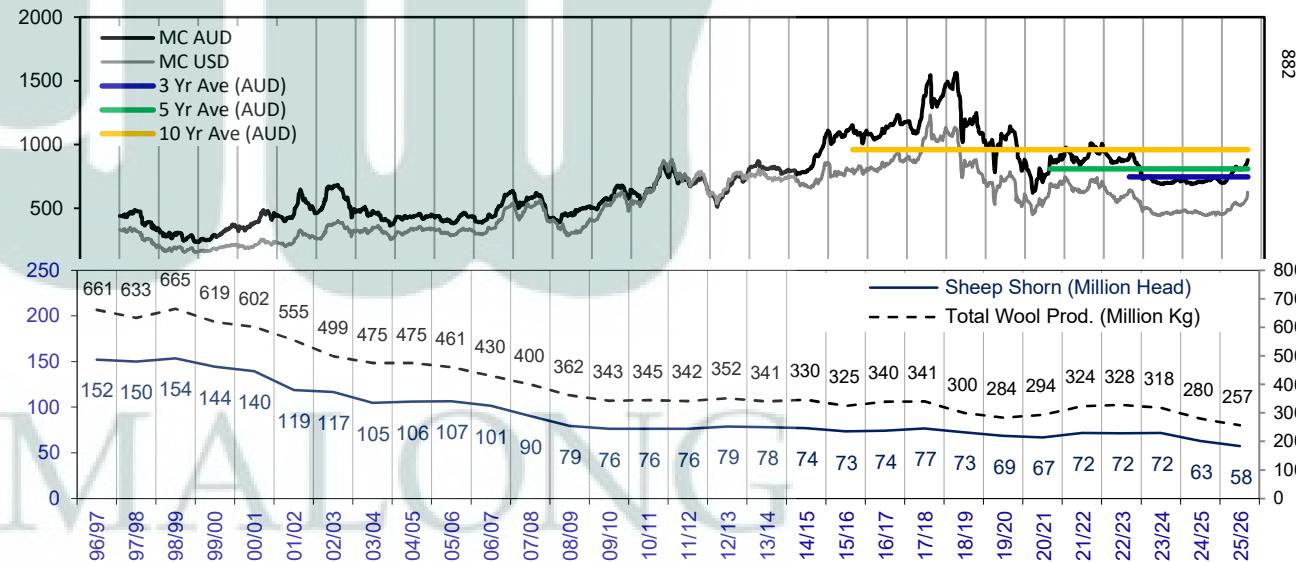

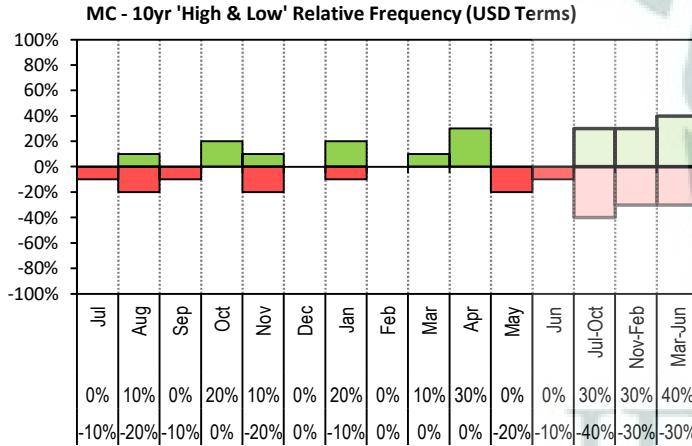

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

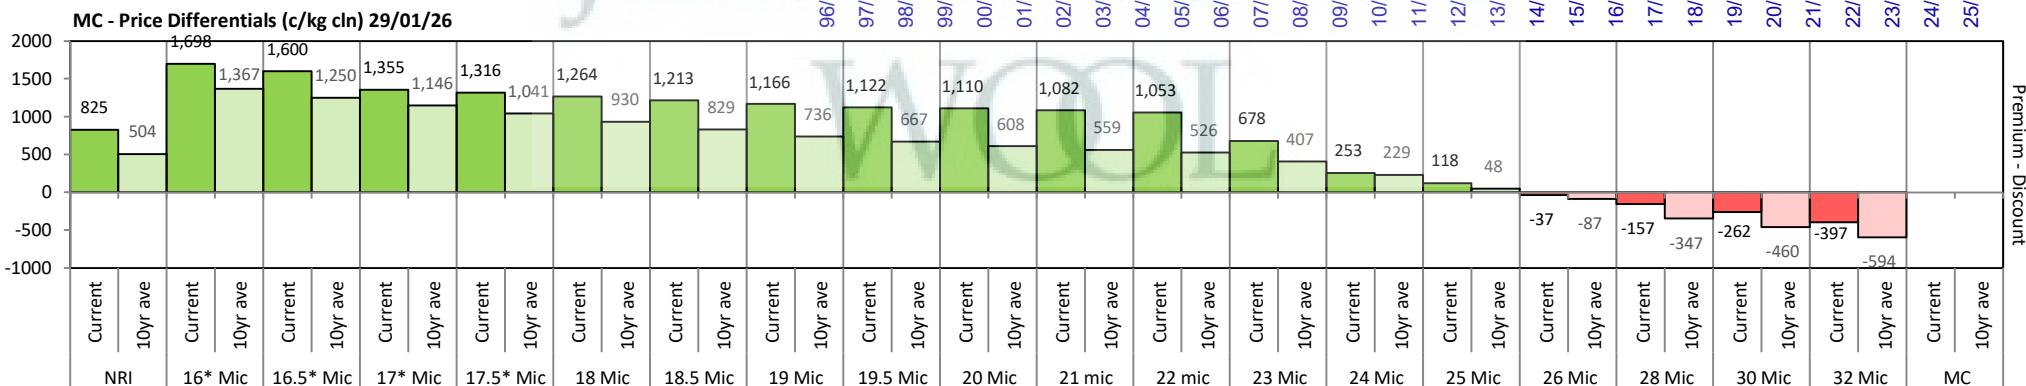

32 Mic - Price Differentials (c/kg cln) 29/01/26

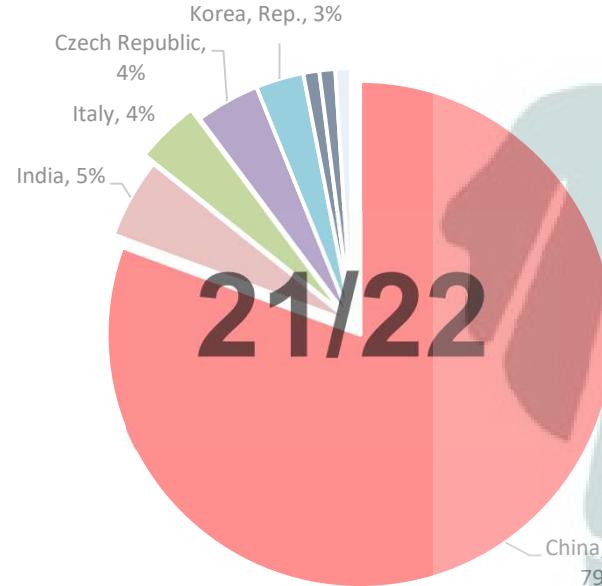

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

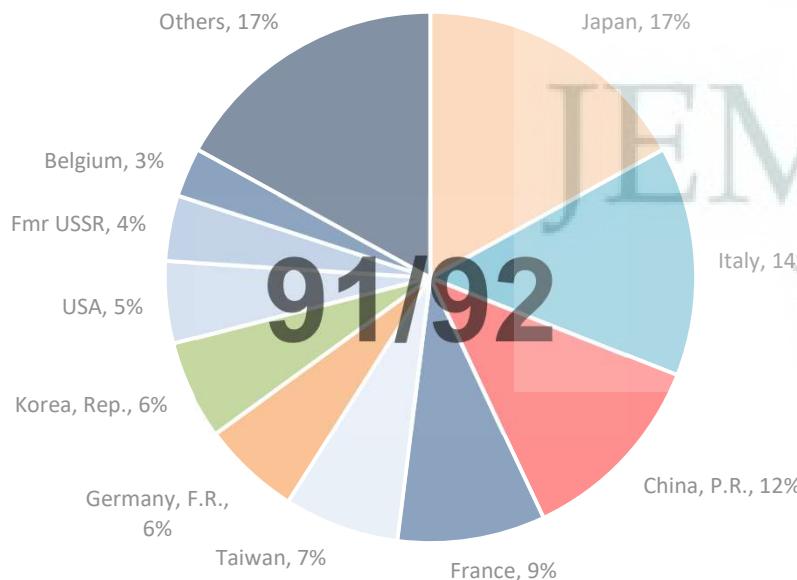

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
