* Note: Due to the irregular market quoting for some micron categories, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. In the instance where AWEX MPG's are not available for any micron, an estimated MPG will be shown, based on the best available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

90.02 US as of 29/10/2009

NORTHERN REGION – Sale N18/09 (54,045 bales offered nationally)

Tuesday

Merino Fleece: The offering was predominately fine consisting of Spinners to Best Top Making styles. A softer tone in the market had 16 microns and broader around 10 cents cheaper with the better style and strength lots least affected. Super fine lots (<16 micron) struggled from the start and were considerably lower than last Newcastle sale.

Merino Skirting's: A stylish selection of mostly 18 micron and finer attracted some premiums, while the good to average style types were only just there.

Oddments: Fine Lock's finished generally 10 cents easier, however Crutching's on a limited offering remained very firm and stains were unchanged.

Crossbreds: There were insufficient volumes of crossbred wool on offer to quote.

Offering: 3,622 bales were offered in the North with 7.7% Passed In.

Wednesday

Merino Fleece: Despite a further fall in the AUD, the market again reduced it's levels, with the fine end of 16.5 to 18.5 microns falling 20-30 cents. 19 microns and broader fell around 10 cents however the 16 micron range remained unchanged although microns below 16 fell 3-4%.

Merino Skirting's: Most descriptions were generally unchanged with premiums being paid for the better style & strength additionally measured lots.

Oddments: Locks & Crutching's remained firm, tending in sellers favour.

Crossbreds: A limited selection of 27 to 30 micron indicated a 5 cent reduction on a nominal basis.

Offering: 6,722 bales were offered in the North with 11.8% Passed In.

Thursday

Merino Fleece: An irregular start soon gave way to increased buyer interest as the sale progressed, the market closed par to sellers favour for 16 microns and broader. Finer microns (<16 um) met with strong grower resistance resulting in a large percentage of super fine lots being passed in.

Merino Skirting's: Once again the offering consisted of mostly 19 microns and finer, those types with less than 3% Vm closed fully firm with all other descriptions showing no quotable change.

Oddments: All categories remained unchanged.

Crossbreds: A slight increase in the volume offered, drew out some buyer interest with 27 to 28 microns 5 cents dearer.

Offering: 5,774 bales were offered in the North with 14% Passed In.

48,269 bales are rostered for next week's sale, Jemalong are selling on Thursday November 5.

A **Decile rank** is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A **percentile** is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 6: Returns for fleece wool pr head, based on skirted weight of: **8 kg**

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 8: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 13 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 2kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

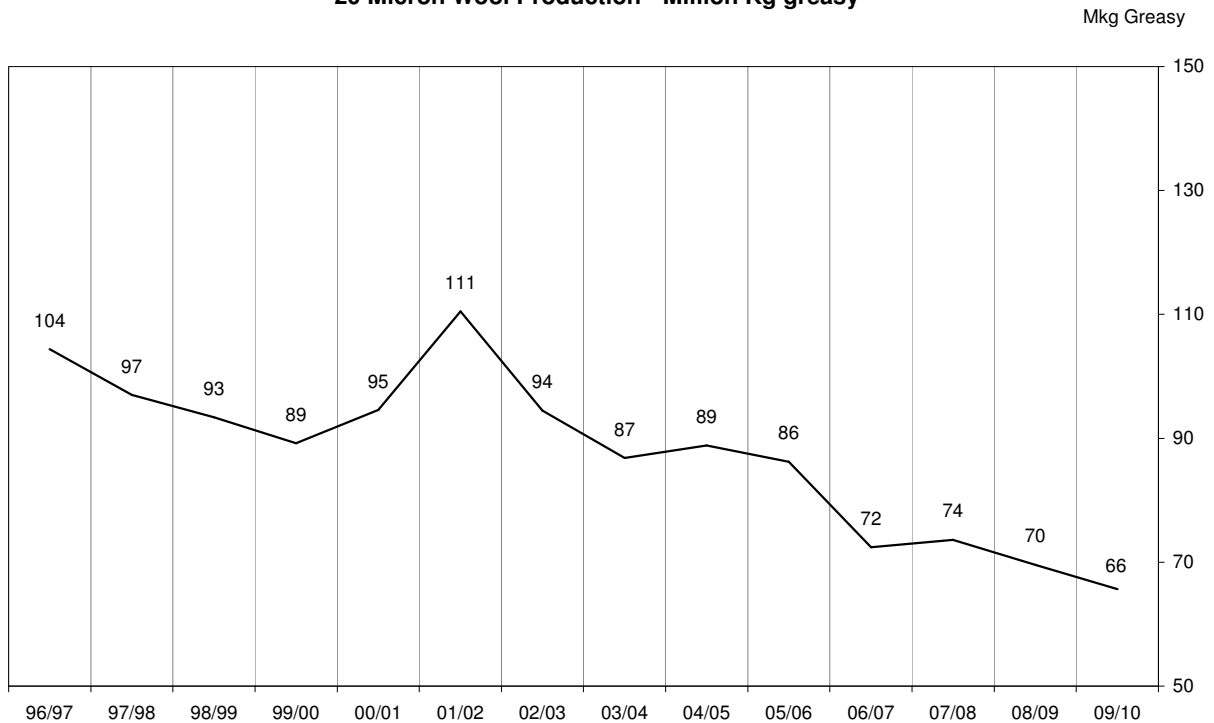

Fine Wool Production (Less than 19 microns)
Million Kg greasy
