## Note:

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

## Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

**One Australian Dollar = 1.046375 US as of: 29/11/2012**

**NORTHERN REGION –Sale Week 22/12 (55,412 bales offered nationally)**

Wednesdays market saw the finer end ease after last week's stylish selection, while the medium microns remained firm. 18.5 micron and finer lost 15-20 cents, while 19 to 20 microns attracted buyer support. The broader end closed 10 cents cheaper, when compared to Tuesdays Melbourne sale. Good support had lower Vm skirtings fully firm tending dearer, while the burrier lots with 5-8% Vm gained 10-20 cents for most microns. Crutchings remained firm, tending dearer while locks & stains gained 10-15 cents. The crossbred market maintained similar levels to Melbourne on Tuesday. 4.5% PI

Thursdays market had the finer microns gain pace after a slow start, to close 20 to 30 cents dearer (with the 17 micron area most affected). The medium to broader microns all lifted by 20 cents with 19.5 and 21 microns being the main buyer focus. All merino skirtings were well supported and generally gained 20 cents across most microns, however the lower Vm types with less than 4% Vm were most affected. Buyer pressure also pushed locks 40 cents higher while stains gained 20 cents and crutchings 10. In the crossbreds, good competition also had 27 to 30 microns 10 cents dearer. 7.5% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
